SUNPOLYCLEANSE STONE CLEANING AGENT

SUNPOLYCLEANSE is a special type of surface cleaner which is very efficient on mosses and mould fungus. It is used to clean all conventional old or new substrates cast, concrete, stoneware or sintered glass, brick stone etc. It does not attack glass, paints, joinery and aluminum constructions.

APPEARANCE

White amorphous powder

CHEMICAL NATURE

Cellulosic based non ionic + Fungicide. It is not an acidic material. It is neutral in character.

PREPARATION OF THE PRODUCT

Add the powder to water under continuous stirring so as to get uniform suspension. Approximately 5 to 10% powder in water suspension should be used.

APPLICATION

- Spread the suspension by brush or spray evenly on the surface to be treated beginning at the upper parts.
- Wait for about 5 mins and then scrub it well with appropriate brush (nylon, metal etc.)
- Rinse thoroughly using water jet.
- Repeat the operation if required.

CONSUMPTION

Various on the surface to be cleaned.

SAFETY MEASURES

Although the material is harmless, the user has to be protected suitably by gloves, goggles, helmet and waterproof jacket.

PACKING

20, 200 ltrs HDPE containers.
