

SUNPOLICURE W

CLEAR AND PIGMENTED WATER BASED CURING COMPOUND.

SUNPOLICURE is a concrete or mortar curing compound.

USES

It eliminates / replaces the usual water curing process.

ADVANTAGES

- Often, water curing may get neglected due to shortage or scarcity of water, shortage of salt-free water. (Presence of sulphates and chlorides is particularly undesirable), shortage of labour, difficult to reach areas, labourers and persons concerned may be ignorant about the importance of curing, Additional cost is involved in curing for the full specified period.
- All of the above are overcome by use of SUNPOLICURE W

INSTRUCTIONS FOR USE

- Wet the de-shuttered concrete thoroughly with water.
- Make sure that the entire surface has been wetted once to compensate for losses due to evaporation which may have occurred until then.
- Apply SUNPOLICURE by brush, hand-operated or powered spray-gun as soon as the concrete surface turns matty.
- The film of SUNPOLICURE will gradually disappear through traffic and weathering.

COVERAGE

- 10 m²/ L depending upon the surface, wind, humidity and temperature.

CONFORMANCE

- Conforms to ASTM-309-74.

SUNANDA

SPECIALITY COATINGS PVT.LTD
AN ISO 9001:2008 COMPANY

PACKING

- 1, 5, 20 Litre.

STORAGE & SHELF LIFE

- 12 months when stored in a cool & dry place; Away from direct sunlight, in original sealed packing.
